

# Aako Betaine Anhydrous 99%

## Betaine

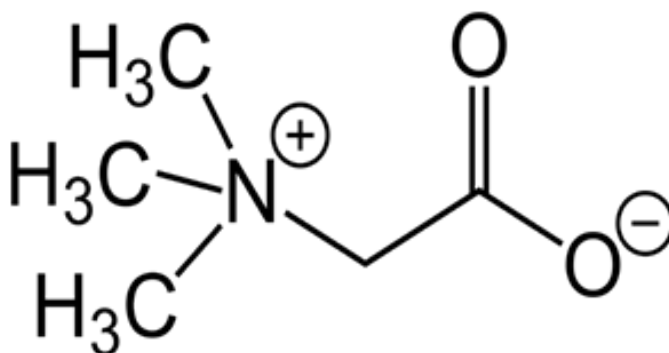

### Description

Aako Betaine Anhydrous is a white crystalline powder, which has excellent water binding and retention characteristics. This makes it very suitable as humectant and moisturizer for the skin.

Betaine can also increase the solubility in water of a variety of active compounds. In this way it is a non-hazardous water soluble co-solvent or solubilizer replacing or complement products like glycol ethers.

In hair products Betaine acts as an anti-static and hair conditioning product.

▪ Chemical names	Methanaminium, 1-carboxy-N,N,N-trimethyl-, hydroxide, inner salt / Trimethylglycine
▪ INCI name	Betaine
▪ CAS number	107-43-7

## Aako Betaine Anhydrous 99%

### Typical properties

Appearance	White crystalline powder
Assay (on dried basis)	> 98%
Loss on drying	< 2%
Burnt residue	< 0.1%
NaCl content	< 0.1%

### Storage:

Stored under dry conditions in tightly closed dry containers. Shelf life of 2 years under appropriate conditions of storage.
