

Aako GLDA 38

Description

Aako GLDA 38 is an aqueous solution of an amino acid based natural chelating agent. It is highly effective at low concentrations of water at a very wide acidic and alkaline pH range. Aako GLDA 38 is readily biodegradable and can be considered as one of the most environmentally friendly chelators without compromising product performance.

| ▪ Chemical name | L-glutamic acid N,N-diacetic acid, tetrasodium salt; |
| ▪ CAS number | 51981-21-6 |

Aako GLDA 38

Typical properties

Appearance	Yellow Liquid
pH (1% solution)	11 - 12
Content GLDA-4Na	≥ 38 %
Content NTA-3Na	≤ 0.1 %

Storage:

Shelf life of 24 months under appropriate conditions of storage.
