

# Aako GLDA Solid

## Description

Aako GLDA Solid is a solid white powder of an amino acid based natural chelating agent. It is highly effective at low concentrations of water at a very wide acidic and alkaline pH range. Aako GLDA Solid is readily biodegradable and can be considered as one of the most environmentally friendly chelators without compromising product performance.

| ▪ Chemical name | L-glutamic acid N,N-diacetic acid, tetrasodium salt; |
| ▪ CAS number    | 51981-21-6   |

## Aako GLDA Solid

### Typical properties

Appearance	White Powder
pH (1% solution)	11 - 12
Content GLDA-4Na	≥ 80 %
Content NTA-3Na	≤ 0.1 %

### Storage:

Shelf life of 24 months under appropriate conditions of storage.
