

Aako MGDA 3Na Powder

Description

Aako MGDA 3Na Powder is the trisodium salt of an amino acid based natural chelating agent. It is highly effective at low concentrations of water at a very wide acidic and alkaline pH range. MGDA 3Na Powder is readily biodegradable and can be considered as one of the most environmentally friendly chelators without compromising product performance.

▪ Chemical name	Methylglycine N,N-diacetic acid, trisodium salt
▪ CAS number	164462-16-2

Aako MGDA 3Na Powder

Typical properties

Appearance	Slight Yellow Powder
pH (10 gram /L)	11 - 12
Content MGDA-3Na	≥ 84 %
Content NTA-3Na	≤ 0.1 %

Storage:

Shelf life of 24 months under appropriate conditions of storage.
