AakoSun BP3

Benzophenone-3

Description

AakoSun BP3 is an oil soluble ultraviolet absorber widely used in sunscreens and cosmetics. As a broadband it's an effective absorber of UV A & UV B radiation. AakoSun BP3 has a high resistance to thermal degradation. The product is compatible with a wide variety of polymers. It can also offer protection of colorants against fading and help stabilize fragrances and active ingredients against degradation or oxidation.

Chemical name	2-Hydroxy-4- methoxybenzophenone
■ INCI/USAN name	Benzophenone-3 / Oxybenzone
CAS number	131-57-7
Formula	C ₁₄ H ₁₂ O ₃ MW 228.24 g/mol
■ UV A & B absorber	Oil Soluble powder

Sun Care

UV filter | AakoSun BP3 | Mar 20

AakoSun BP3

Typical properties

Appearance: Pale greenish yellow crystalline

powder

Assay: 97 − 103% Melting Point 62 − 65 °C Congealing temperature \geq 62 °C Specific Extinction (E₂₈₈ nm 1%, 1cm): \geq 630 Specific Extinction (E₃₂₅ nm 1%, 1cm): \geq 410

Regulatory Status:

EU 6% Max. as UV filter

Regulation (EC) No 1223/2009 Annex VI entry 4

EU 0.5% Max to protect product formulations

Storage:

Must be stored in closed containers in dry cool conditions. Minimum shelf life of 4 years in unopened containers under appropriate conditions of storage.
