

# AakoSun OCR

## Octocrylene

### Description

AakoSun OCR is an oil-soluble UV B filter that is approved for use in sun-care preparations in many countries worldwide. As it is hydrophobic and miscible with many emollients, it is particularly suitable for water-repellent and water-resistant formulations. It can be combined with other oil-soluble UV filters such as AakoSun OTZ and AakoSun BEMT to give products with a high SPF. AakoSun OCR also has excellent stability to light and helps to stabilize AakoSun AVB.
